SUMMARY

Driven by a passion for technology and problem-solving, I transitioned into software engineering through a rigorous BootCamp. I thrive on creating efficient solutions, troubleshooting bugs, and architecting scalable applications. My goal is to leverage my skills in web development to drive innovation and contribute to impactful projects. I am eager to learn, grow, and collaborate with teams to build high-quality software solutions.

PROJECT

Streaming Website Development | Live Demo: Movie Trailers   **2024**

Designed and developed a movie streaming website that dynamically fetches and displays movie and TV show information using APIs. Implemented interactive features to enhance user engagement.

- Tech Stack: HTML, CSS, JavaScript, API Integration
- Built a fully responsive UI for an optimal user experience.
- Developed a trailer preview feature using JavaScript to fetch and embed videos.
- Implemented a light/dark mode toggle for user customization.
- Optimized performance by efficiently handling API requests and DOM manipulations.

Direct Connect Ventures Website | Live Demo: Website   **2025**

Developed a website for Direct Connect Ventures(client/customer), an organization dedicated to empowering individuals with disabilities through inclusive programming and support services. The site emphasizes accessibility, user-friendly navigation, and clear communication of the organization's mission.

- Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js
- Designed a fully responsive layout for accessibility across all devices.
- Implemented an interactive navigation system with smooth scrolling and active state indicators.
- Integrated high-contrast visuals and typography to enhance readability.
- Developed a user-friendly contact form for direct communication.
- Ensured cross-browser compatibility and progressive enhancement for older browsers.

EDUCATION & CERTIFICATIONS

TripleTen Bootcamp   **Jan 2024 - Present**
Software Engineering Certificate

Arizona State University   **August 2018 - 2020**
Engineering Studies

KEY SKILLS

- Front-End: HTML, CSS, JavaScript, React
- Back-End: Node.js, Express.js
- Programming Concepts: Object-Oriented Programming (OOP), API Integration

- Problem-Solving & Debugging
- Analytical Thinking & Logical Reasoning
- Collaboration & Teamwork
- Fast Learner with a Growth Mindset
