Ebenezer Yegezu

SOFTWARE DEVELOPER

" I am excited to contribute to the ever-evolving landscape of technology and make a meaningful difference in the lives of others. "

Qualifications

2018 - 2020

Engineer
Arizona State University

2023 - Current

Cetificate
Software Engineering
TripleTen Bootcamp

About Me

Driven by a passion for helping others and a fascination with system intricacies, I ventured into software engineering via a BootCamp. My joy lies in problem-solving, and I'm eager to apply my skills to create positive change. From troubleshooting bugs to architecting software systems, I thrive on the challenge of finding elegant solutions. Excited to grow professionally and share my knowledge, I aim to make a lasting impact through innovative solutions and collaborative efforts.

Key Skills

- Proficient in HTML, CSS, and JavaScript
- "Proficient in designing and implementing OOP applications with expertise in integrating Experience APIs."
- Strong problem-solving abilities
- Excellent analytical skills
- Collaborative team player
- Quick learner with a desire for continuous improvement

Experience

Check my personal portfolio here:

Streaming Site   https://abuye602.github.io/Movie_Trailers/

I developed a streaming website that exclusively showcases movies and TV shows, integrating functionalities to display descriptions and trailers. Using HTML, I structured the site's content, while CSS was employed for design elements, ensuring a visually appealing interface. Leveraging JavaScript, I dynamically manipulated the Document Object Model (DOM) to retrieve classes and extract API information for trailers, enhancing user experience and engagement. Additionally, I implemented features for toggling between light and dark modes, demonstrating proficiency in JavaScript for interactive website development.
